Experience

User experience researcher

Jireh Health

Apr 2025 – Sep 2026

Sole designer on an accessible health-financing app for 4 facilities and 1,800+ users.

- Redesigned onboarding and signup, cutting median completion time from 5.2 to 2.1 minutes (59%).
- Shipped Discovery/Explore and Profile Hub, each reaching 80+ monthly active users within four months, as the platform grew from 396 to 770.
- Led the design-system modernisation: reusable primitives, semantic tokens and shared patterns across B2C mobile and B2B web.
- Built a prototyping tool that mirrors the live frontend, so research and testing no longer wait on the backend.

Product designer

Leja

Nov 2022 – Jun 2025

Design associate, Feb – Oct 2022

Onboarding, referral and transaction flows for a B2B fintech app used by Kenyan small businesses. Led a two-person design and research team.

- Owned flows end to end: research, design, developer handoff, and iteration from usage.
- Designed for low-bandwidth, non-technical and non-English-dominant users.
- Formally led a two-person design and research team on a dedicated initiative, while staying hands-on.
- Built interactive prototypes for partnership pitches and product demos.

– Championed WCAG 2.1 accessibility and wrote handoff documentation.

Data & machine learning
